Top Gun FR is an acrylic coated, 100% woven flame retardant polyester fabric (600 denier) utilizing a proprietary formula and process to coat the top and bottom, allowing the fabric to be completely reversible. Top Gun FR meets most known flame retardant specifications, both initial and leaching. That means that unlike other fabrics, you don't have to worry about still meeting a flame specification after it has been exposed to the elements. As the part of the Top Gun family of premium coated fabrics, it is characterized by excellent strength, durability, tear and abrasion resistance, dimensional stability, UV and mildew resistance, making Top Gun FR the ultimate flame retardant coated fabric. Top Gun FR is perfect for awnings, tents, gazebos, canopies or any application requiring colorfastness and flame resistance.

Top Gun FR, a hot alternative in flame retardant fabrics.
